

VISHANT VORA

President, Global Operations and Managed Services

Vishant leads Mavenir's global end-to-end network design, rollout and deployments, solutions and systems integration services, managed services and related strategic growth initiatives.

Vishant brings over 30 years of deep, global experience in the Telecommunications industry to this role. Having spent the past 20 years with the Vodafone Group, Vishant most recently served as Chief Technology Officer for Vodafone Idea in India, where he was responsible for providing strategy, people, budget and overall delivery for the technology aspects of the company. Most significantly, Vishant played an instrumental role in the integration of Vodafone and Idea in 2017, including steering the post-merger integration of the two companies and transforming the business to become a 5G-ready Digital Telco.

Vishant holds a BSEE from the Lawrence Technology University and has completed the General Management Program from the Harvard Business School.
